<p>Technology Standards</p>	<p>8.1.2.A.4 Demonstrate developmentally appropriate navigation skills in virtual environments (i.e. games, museums). 8.1.2.C.1 Engage in a variety of developmentally appropriate learning activities with students in other classes, schools, or countries using various media formats such as online collaborative tools, and social media. 8.1.2.E.1 Use digital tools and online resources to explore a problem or issue.</p>
------------------------------------	--

Unit 1 Grade 1 – Add and subtract within 10

Unit 1 Grade 1 – Add and subtract within 10		
Content Standards	Suggested Mathematical Practices	Transfer
<ul style="list-style-type: none"> 1.OA.A.1. Use addition and subtraction within 20 to solve word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, <i>e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.</i> *(benchmarked) 	<p>MP.1 Make sense of problems and persevere in solving them.</p> <p>MP.2 Reason abstractly and quantitatively.</p> <p>MP.3 Construct viable arguments and critique the reasoning of others.</p> <p>MP.4 Model with mathematics.</p> <p>MP.5 Use appropriate tools strategically.</p> <p>MP.8 Look for and express regularity in repeated reasoning.</p>	<p>Concept(s):</p> <ul style="list-style-type: none"> Symbol (unknowns) can be in any position. <p>Students are able to:</p> <ul style="list-style-type: none"> add, using objects and drawings, to solve word problems involving situations of adding to and putting together. subtract, using objects and drawings, to solve world problems involving situations of taking from and taking apart. <p>Learning Goal 1: Use addition and subtraction <u>within 10</u> to solve problems, including word problems involving situations of adding to, taking from, putting together, taking apart, and comparing with unknowns in all positions.</p>

Fairfield Township School – 1st Grade Math Curriculum Guide

<ul style="list-style-type: none"> 1.OA.B.3. Apply properties of operations as strategies to add and subtract. <i>Examples: If $8 + 3 = 11$ is known, then $3 + 8 = 11$ is also known. (Commutative property of addition.) To add $2 + 6 + 4$, the second two numbers can be added to make a ten, so $2 + 6 + 4 = 2 + 10 = 12$. (Associative property of addition.)</i> <i>Students need not use formal terms for these properties)</i>*(benchmarked) 	<p>MP.2 Reason abstractly and quantitatively.</p> <p>MP.7 Look for and make use of structure.</p> <p>MP.8 Look for and express regularity in repeated reasoning.</p>	<p>Concept(s):</p> <ul style="list-style-type: none"> Knowing $4 + 3$ means that $3 + 4$ is also known (commutative property/fact families). When adding, the numbers need not be added in any particular order. <p>Students are able to:</p> <ul style="list-style-type: none"> add and subtract, within 10, using properties of operations as strategies (commutative property). <p>Learning Goal 2: Apply properties of operations (commutative property) as strategies to add or subtract <u>within 10</u>.</p>
<ul style="list-style-type: none"> 1.OA.B.4. Understand subtraction as an unknown-addend problem. <i>example, subtract $10 - 8$ by finding the number that makes 10 when added to 8</i> 	<p>MP.2 Reason abstractly and quantitatively.</p> <p>MP.7 Look for and make use of structure.</p> <p>MP.8 Look for and express regularity in repeated reasoning.</p>	<p>Concept(s):</p> <ul style="list-style-type: none"> Subtraction can be represented as an unknown-addend problem. Finding 9 minus 3 means solving $? + 3 = 9$ or $3 + ? = 9$ (fact families). <p>Students are able to:</p> <ul style="list-style-type: none"> represent subtraction as an unknown addend problem. solve subtraction problems, <u>within 10</u>, using unknown addends. <p>Learning Goal 3: Solve subtraction problems, <u>within 10</u>, by representing subtraction as an unknown added problem and finding the unknown addend</p>
<ul style="list-style-type: none"> 1.OA.C.5. Relate counting to addition and subtraction (e.g., by counting 2 to add 2). 	<p>MP.2 Reason abstractly and quantitatively.</p> <p>MP.7 Look for and make use of structure.</p>	<p>Concept(s):</p> <ul style="list-style-type: none"> Counting can be used to add and subtract. <p>Students are able to:</p> <ul style="list-style-type: none"> count on to add. count back to subtract. <p>Learning Goal 4: Count on to add and count backwards to subtract to solve addition and subtraction problems <u>within 10</u>.</p>

Fairfield Township School – 1st Grade Math Curriculum Guide

<ul style="list-style-type: none"> 1.OA.D.7. Understand the meaning of the equal sign, and determine if equations involving addition and subtraction are true or false. <i>example, which of the following equations are true and which are false? $6 = 6$, $7 = 8 - 1$, $5 + 2 = 2 + 5$, $4 + 1 = 5 + 2$.</i> 	<p>MP.2 Reason abstractly and quantitatively.</p> <p>MP.3 Construct viable arguments and critique the reasoning of others.</p> <p>MP.6 Attend to precision.</p> <p>MP.7 Look for and make use of structure.</p>	<p>Concept(s):</p> <ul style="list-style-type: none"> The meaning of the equal sign True and false statements The expression can be on the right side of the equal sign (<i>e.g.</i> $7 = 8 - 1$). Both the left and right side of the equal sign may contain expressions (<i>e.g.</i> $5 + 2 = 1 + 4$). <p>Students are able to:</p> <ul style="list-style-type: none"> determine if addition equations are true or false. determine if subtraction equations are true or false. <p>Learning Goal 5: Determine if addition and subtraction equations, <u>within 10</u>, are true or false.</p>
<ul style="list-style-type: none"> 1.OA.D.8. Determine the unknown whole number in an addition or subtraction equation relating three whole numbers. <i>example, determine the unknown number that makes the equation true in each of the equations $8 + ? = 11$, $5 = _ - 3$, $6 + 6 = _$. *(benchmarked)</i> 	<p>MP.2 Reason abstractly and quantitatively.</p> <p>MP.6 Attend to precision.</p> <p>MP.7 Look for and make use of structure.</p>	<p>Concept(s): No new concept(s) introduced</p> <p>Students are able to:</p> <ul style="list-style-type: none"> determine the unknown number that makes an equation true. solve addition or subtraction equations by finding the missing whole number. <p>Learning Goal 6: Solve addition and subtraction equations, <u>within 10</u>, by finding the missing whole number in any position.</p>

Fairfield Township School – 1st Grade Math Curriculum Guide

<ul style="list-style-type: none"> 1.NBT.A.1. Count to 120, starting at any number less than 120. In this range, read and write numerals and represent a number of objects with a written numeral *(benchmarked) 	<p>MP.2 Reason abstractly and quantitatively.</p> <p>MP.7 Look for and make use of structure.</p> <p>MP.8 Look for and express regularity in repeated reasoning.</p>	<p>Concept(s):</p> <ul style="list-style-type: none"> Number names and the count sequence up to 100 <p>Students are able to:</p> <ul style="list-style-type: none"> count orally by ones <u>up to 100</u>. count up to 100 beginning at any number less than 100. read numerals up to 100. write numerals up to 100. represent a number of objects up to 100 with a written number. <p>Learning Goal 7: Count to 100 orally, read and write numerals, and write numerals to represent the number of objects (<u>up to 100</u>).</p>

Focus Mathematical Concepts

Vocabulary	Instruction and Pacing	
Addition, subtraction, number line, counting forward, counting backward, altogether, tens, ones, total, missing, true , false, equal sign, blank space	Pretest	1 day
	Adding within 10	1 week
	Subtracting within 10	1 week
	Apply properties to add and subtract	1 week
	Fact families	1 week
	Counting on and counting back to add and subtract	1 week
	Working with the equal sign	1 week
	Equations relating 3 whole numbers	2 weeks
Count to 120	1 week	

ENDURING UNDERSTANDING	ESSENTIAL QUESTIONS
<ul style="list-style-type: none"> ● Numbers are sequential ● Addition problems can be solved by counting forward ● Subtraction problems can be solved by counting backward ● Two-digit numbers represent amounts of tens and ones ● An equation must be equal on both sides ● The sequence of numbers remains the same regardless of where one begins? counting ● The number of objects displayed can be represented with a written numeral 	<ul style="list-style-type: none"> ● What is the relationship between addition and subtraction? ● What strategies can be used to add and subtract? ● How does understanding place value help you solve addition and subtraction problems? ● How can we represent and solve word problems involving addition and subtraction? ● How do we manipulate addition and subtraction equations? ● How can we extend the counting sequence?

Fairfield Township School – 1st Grade Math Curriculum Guide

Differentiation and Accommodations	District/School Primary and Supplementary Resources
<ul style="list-style-type: none"> ● Provide graphic organizers ● Provide additional examples and opportunities for additional problems for repetition ● Provide tutoring opportunities ● Provide retesting opportunities after remediation (up to teacher and district discretion) ● Teach for mastery not test ● Teaching concepts in different modalities ● Adjust pace and homework assignments 	<ul style="list-style-type: none"> ● Go Math!! ● IXL ● Teacher created materials
Instructional Strategies	
<p>Fairfield Township School recognizes the importance of the varying methodologies that may be successfully employed by teachers within the classroom and, as a result, identifies a wide variety of possible instructional strategies that may be used effectively to support student achievement. These may include, but not be limited to, strategies that fall into categories identified by the Framework for Teaching by Charlotte Danielson:</p> <ul style="list-style-type: none"> ● Communicating with students ● Using questioning and discussion techniques ● Engaging students in learning ● Using assessment in instruction ● Demonstrating Flexibility and Responsiveness 	
Common Misconceptions	Proper Conceptions

Fairfield Township School – 1st Grade Math Curriculum Guide

<ul style="list-style-type: none"> ● Students count objects incorrectly ● Students incorrectly write sums ● A number sentence should have words ● Number sentences written vertically are different ● Students make errors with addition sentences ● In subtraction, students move the wrong number of counters ● Students become confused with objects that are left and objects taken away ● Students confuse taking away zero with taking away all ● Students incorrectly write sums ● A number sentence should have words ● Number sentences written vertically are different ● Students make errors with addition sentences ● In subtraction, students move the wrong number of counters ● Students become confused with objects that are left and objects taken away ● Students have difficulty matching sets objects to see which has fewer ● How many more is a clue to add two sets of objects to have more ● There is only one way to write an addition or subtraction sentence ● The equal sign always has to be toward the end of a number sentence 	<ul style="list-style-type: none"> ● Practice Counting various groups of objects and/or mark objects counted ● Counting and checking the total in each group will give the correct sum ● Number sentences are written with numbers and signs ● A number sentence can be written several ways ● Counting and/or acting out the number story helps to check answers ● Counting objects and rechecking can make sure numbers are correct ● Cover the objects taken away to see what is left ● Cover objects taken away or act out taking away zero ● Counting and checking the total in each group will give the correct sum ● Number sentences are written with numbers and signs ● A number sentence can be written several ways ● Counting and/or acting out the number story helps to check answers ● Counting objects and rechecking can make sure numbers are correct ● Cover the objects taken away to see what is left ● Matching or drawing lines to sets of objects helps to compare sets ● How many more is a strategy to compare which group has more ● There are several ways to write addition and subtraction sentence ● An equal sign is used to show the same amount is on both sides of an equation
---	--

Performance Task

- **You are in charge of getting the apples from the cafeteria for your class. There are 13 students in the class now. The teacher says that 4 more students will be arriving later. You must figure out how many apples to get from the cafeteria. Draw a picture that shows how many apples you need altogether. Write a number sentence to show how many are needed.**
- **The teacher has asked you to sharpen 18 pencils before lunch break. So far you have sharpened 12 pencils. How many pencils still need to be sharpened? Draw a picture to show how many are left to be sharpened. Write a number sentence to show how many pencils still need to be sharpened.**

Rubric

- 3 point answer: Student is able to complete entire task correctly**
- 2 point answer: Student is able to complete 2 of the 4 tasks correctly**
- 1 point answer: Student is unable to complete 2 of the 4 tasks correctly**

<p>Instructional Strategies</p>	

Fairfield Township School – 1st Grade Math Curriculum Guide

Fairfield Township School recognizes the importance of the varying methodologies that may be successfully employed by teachers within the classroom and, as a result, identifies a wide variety of possible instructional strategies that may be used effectively to support student achievement. These may include, but not be limited to, strategies that fall into categories identified by the Framework for Teaching by Charlotte Danielson:

- Communicating with students
- Using questioning and discussion techniques
- Engaging students in learning
- Using assessment in instruction
- Demonstrating Flexibility and Responsiveness

Common Misconceptions

Proper Conceptions

Fairfield Township School – 1st Grade Math Curriculum Guide

<ul style="list-style-type: none"> ● Students count objects incorrectly ● Students incorrectly write sums ● A number sentence should have words ● Number sentences written vertically are different ● Students make errors with addition sentences ● In subtraction, students move the wrong number of counters ● Students become confused with objects that are left and objects taken away ● Students confuse taking away zero with taking away all ● Students incorrectly write sums ● A number sentence should have words ● Number sentences written vertically are different ● Students make errors with addition sentences ● In subtraction, students move the wrong number of counters ● Students become confused with objects that are left and objects taken away ● Students have difficulty matching sets objects to see which has fewer ● How many more is a clue to add two sets of objects to have more ● There is only one way to write an addition or subtraction sentence ● The equal sign always has to be toward the end of a number sentence 	<ul style="list-style-type: none"> ● Practice Counting various groups of objects and/or mark objects counted ● Counting and checking the total in each group will give the correct sum ● Number sentences are written with numbers and signs ● A number sentence can be written several ways ● Counting and/or acting out the number story helps to check answers ● Counting objects and rechecking can make sure numbers are correct ● Cover the objects taken away to see what is left ● Cover objects taken away or act out taking away zero ● Counting and checking the total in each group will give the correct sum ● Number sentences are written with numbers and signs ● A number sentence can be written several ways ● Counting and/or acting out the number story helps to check answers ● Counting objects and rechecking can make sure numbers are correct ● Cover the objects taken away to see what is left ● Matching or drawing lines to sets of objects helps to compare sets ● How many more is a strategy to compare which group has more ● There are several ways to write addition and subtraction sentence ● An equal sign is used to show the same amount is on both sides of an equation

Performance Task

You have been selected to be the teacher for a day. Show how you would teach the class how to solve the following problems. Include pictures and a number sentence for each. Solve the number sentences.

Bob has 5 toy cars. Jim has 8 toy cars. How many toy cars do Bob and Jim have altogether?

Jane came to school with 12 cookies. She gave 7 cookies to her friends. How many cookies does Jane have left?

The farm had 2 horses, 5 cows, and 4 pigs. How many animals are at the farm altogether?

Mary had some pencils. She gave 8 of her pencils to Bill and the other 7 pencils to Sue. How many pencils did she have at first?

Rubric

3 point answer At least three problems are correct

2 point answer At least one part of two problems is correct

1 point answer Fewer of one part of two problems is correct

Fairfield Township School – 1st Grade Math Curriculum Guide

Unit 3 Grade 1		
Content Standards	Suggested Standards for Mathematical Practice	Critical Knowledge & Skills
<ul style="list-style-type: none"> 1.NBT.B.2. Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases: 1.NBT.B.2.c. The numbers 10, 20, 30, 40, 50, 60, 70, 80, 90 refer to one, two, three, four, five, six, seven, eight, or nine tens (and 0 ones). *(benchmarked) 	<p>MP.2 Reason abstractly and quantitatively.</p> <p>MP.7 Look for and make use of structure.</p> <p>MP.8 Look for and express regularity in repeated reasoning.</p>	<p>Concept(s):</p> <ul style="list-style-type: none"> Two digits represent amounts of tens and ones. Performance Task

Suggested 100 Day Project

Read Aloud: Set, 100th Day, Go.

Students will

Create a poster of 100 items organized in groups of ten.

Students will present their 100 Day Projects to the class.

Use hundred poster to develop comparison problems.

Use 100 posters to develop a word problem book with addition and subtractions of a 2-digit and 1-digit numbers, and a 2-digit number and a multiple of ten.

Students record a number sentence and solve the problem.

Rubric

•3 point response: The student correctly groups 100 items by ten. Develops a correct comparison problem, creates an addition and subtraction problem and includes a number sentence and solves problem correctly.

*** 2 point response: The student correctly groups 100 items by ten. Develops a correct comparison problem, creates an addition and subtraction problem and includes a number sentence and solves problem incorrectly.**

*** 1 point response: Able to groups items by 100. Unable to make a comparison. Creates an addition and subtraction problem but does not include a number sentence and solves problem incorrectly.**

0 point response: No understanding of place value and is unable to complete the task.

Instructional Strategies

Fairfield Township School recognizes the importance of the varying methodologies that may be successfully employed by teachers within the classroom and, as a result, identifies a wide variety of possible instructional strategies that may be used effectively to support student achievement. These may include, but not be limited to, strategies that fall into categories identified by the Framework for Teaching by Charlotte Danielson:

- Communicating with students
- Using questioning and discussion techniques
- Engaging students in learning
- Using assessment in instruction
- Demonstrating Flexibility and Responsiveness

Common Misconceptions	Proper Conceptions
------------------------------	---------------------------

Fairfield Township School – 1st Grade Math Curriculum Guide

<ul style="list-style-type: none">• Students have difficulty visualizing all sides of solid• A sphere has one flat surface• Different shaped rectangles are altogether different shapes• Students lose track when counting sides• Students have difficulty dividing shapes into equal parts• All halves and fourths are the same size• Students have difficulty remembering all of the names of solid/plane shapes	<p>Using objects the everyday world can help us see attributes of solid figures</p> <p>A Sphere has one curved surface</p> <p>Shapes can be different sizes but the same shape</p> <p>Mark or track the sides of objects when counting sides</p> <p>Divide shapes in half first, then see if it can be divided again equally.</p> <p>A half is equal to two equal parts and fourths are four equal parts divided</p> <p>Shapes have a mathematical name to distinguish their attributes</p>
--	---

Performance Task

Using the 2 shapes below, divide one into halves and the other into quarters. Label each part with the correct term: one-half or one-fourth.

Rubric: 3 point for all correct work
